

PRO COLLAGEN 30s & 60s

Qsilica Ceramosides™ + Antioxidant PRO COLLAGEN One-A-Day Capsules contain a patented natural, gluten free, wheat seed extract known as Ceramosides™ as well as colloidal mineral silica, Acerola Berry and Vitamin C.

Both mineral silica and vitamin C (ascorbic acid) maintain skin health and support collagen formation.

The efficacy of oral supplementation with Ceramosides™ has been demonstrated by two human clinical studies. Research shows results in just 15 days:

- ◇ Ceramosides™ improved skin moisturization after only 15 days. The benefits increased after supplementation for two months. 8 out of 10 volunteers involved in this study felt less pulling sensations after taking Ceramosides™ for 2 months.
- ◇ Ceramosides™ has a powerful effect on skin elasticity, demonstrating an increase of 18% in only 15 days and more than 26% in two months.
- ◇ Reduced wrinkles after only 15 days, with even greater benefits after two months.

Why is it unique?

Ceramosides™ is a patented synergetic complex of concentrated phytoceramides and other lipids. When taken orally, this specific combination allows for improved skin hydration with a low daily dose after only 15 days.

How does it work?

Ceramosides™ brings new ceramides to the skin, helping to lock in moisture and replenish cracks.

Active ingredients per hard capsule:

- Silica – colloidal anhydrous 130 mg (Equiv. to Silicon 60 mg)
- Triticum aestivum (wheat) extract equiv. to dry seed endo 20.01 g (from Ceramosides™ 30 mg), Malpighia glabra (Acerola) extract equiv. to dry fruit 500 mg
- Calcium ascorbate dihydrate.....49.67 mg (Equiv. to Ascorbic acid 45 mg)

Directions: Adults: Take one capsule per day with a glass of water.
