

Joint, Muscle, and Skin Synergy

Collagen Power-Plus™

Collagen Power-Plus formula is the most actively potent hydrolyzed collagen supplement known. This is 100% non-feedlot, grass-fed bovine collagen, predigested through a special enzymatic process. Beware of cheap imitations made from GMO-tainted, corn-fed, feedlot sources.

Collagen Power-Plus is unique, because the collagen is enhanced by the addition of the powerful, protein-digesting enzymes bromelain and papain. These components are potent agents for enhancing blood flow to the joints, and further, they support a healthy inflammation response.* A healthy inflammation response means better cellular absorption.

Collagen Power-Plus is additionally fortified with a wild, raw ionic mineral source, shilajit, from the Himalayan mountains. A rare, fulvic acid-rich complex, shilajit acts synergistically with bovine collagen to maximize its nutritional profile. Wild camu camu, the highest natural plant source of vitamin C, is also added, which greatly enhances a healthy collagen response.* Rosemary and ginger complete the formula by supporting healthy cells and inflammatory response as well.* This combination aids in healthy joint and pain response-supporting powers.*

The formula also contains MCHC, microcrystalline hydroxyapatite, from the optimal source, New Zealand bovine raw bone. While it supports a healthy collagen response, it also supports bone health and bone density response.* MCHC is about 67% minerals and 33% collagenous fibers, which surround collagen for proper structure and healthy cartilage formation. That's why Collagen Power-Plus is unique—the most complete, synergistic, and effective collagen formula available.

Collagen is the material that holds our bodies together. It's essential for life itself.

By the mid-twenties, the body begins losing its ability to repair connective tissue, including bones, tendons, ligaments, cartilage, skin, hair and nails. Even the red blood cells and nerve cells have connective tissue which needs replenishing. As well, there is a significant loss in synovial fluids, needed to lubricate the joints. The joint lining breaks down, which is disastrous and may lead to joint replacement. Because of its rich amount of amino acids, collagen helps repair the body's connective tissue framework. That framework is responsible for a person's physical appearance, as well as the efficiency in function of the joints, muscles, skin, and blood cells. It promotes beauty, too. The amino acids in collagen, alanine, glycine, and proline are crucial for building and rebuilding all skin cells. If the skin is aging and sagging, it has lost its collagen framework. The loss of collagen from the skin is a serious issue. It must be replaced for optimal skin health support as well as hair and nails support. With Collagen Power-Plus you will see a difference in optimal skin health.* This is immediately apparent from skin texture and wrinkle prevention and strong, more beautiful hair and nails.

These amino acids contained in collagen and shilajit are rarely found in any other food. That's why Collagen Power-Plus is an essential supplement for the maintenance of overall health and beauty.*
