

# Cannabis Extract Hempanol-CF™

**Supports a healthy nervous system plus calm & focus**

**Powerful, supercritical, full spectrum cannabis extract—full cannabis profile, including rare, powerful terpenes**

Hempanol-CF is the cannabis extract-based “be calm and focused” formula for overall health support. It’s the only whole food, raw cannabis extract available, a supercritical CO<sub>2</sub> extract. Nothing is added, and nothing is taken away. This is the exclusive, original, supercritical cannabis extract. It is derived from cannabis plants grown only for NAHS on certified organic soil and therefore is not the type that is extracted industrially through solvents. That’s right, much of the cannabis extract on the market is merely residue cannabis from the textile industry, where the active ingredients are extracted with solvents.

Solvents typically used in material made into supplements include acetone, butane, which is lighter fluid, hexane, and alcohol. The solvents, including the petrochemical ones, are driven off by heat; however, in many cases significant residues remain. Furthermore, homeopathically these solvents can never be removed. Regardless, who would knowingly consume herbal or plant extracts treated with noxious solvents, the latter being categorical carcinogens? With Hempanol-CF, no such solvents are ever used, and it is extracted only through supercritical CO<sub>2</sub>, which is entirely a cold process. This means that only Hempanol-CF is raw. Thus, all the key nutrients, including the enzymes, are intact.

Most cannabis extracts are processed with heat, which can be as high as 250 degrees. Both heat and solvents damage the delicate compounds in cannabis, including the terpenes and cannabinoids. Since Hempanol-CF is free of all such noxious chemicals and not heat treated, the natural substances contained in this formula are fully intact, including the highly sophisticated and exceedingly

potent terpenes. This means that these molecules are far more biologically active than those found in heat- and solvent-treated types.

This is the original, raw, crude, unprocessed cannabis extract from the hemp stalk. Accept no cheap imitations made from heat-extracted and/or solvent-corrupted hemp. Hempanol-CF is exclusively whole cannabis extract without any other ingredients in an extra virgin olive oil and hemp seed oil base. It’s easy and beneficial to use every day. The whole family can feel confident that Hempanol-CF is a blessing in a bottle.
