

Multiple spice oil extract **OregaCLEAR**TM

A wild Mediterranean formula for healthy respiratory support

OregaCLEAR is the strongest of all the wild spice oil formulas available. It contains desiccated pure spice oils. A synergistic blend it provides extra power above oregano oil itself. This is the perfect combination of desiccated oils of wild oregano, wild sage, remote-source cumin, and cinnamon. The oregano and sage grow wild in the mountains of the Mediterranean, far from the pollution so common in most areas of the world. Plus, they are free of chemicals, pesticides, and herbicides and are non-irradiated. As these are high mountain plants the sun produces large amounts of electrically charged ions, which increases the potency. The cumin is also grown in mineral-rich soil, and the cinnamon comes from the tropics.

OregaCLEAR capsules are based upon low-temperature desiccation. This state-of-the-art technique of drying concentrates the oils so much that one capsule is equivalent to fifty drops of oregano oil. Now, that's mighty.

The benefits of oregano oil are well established. In order to maximize the benefits of using OregaCLEAR, only the P73 blend of oregano, the highest quality oregano known to man is used. This P73 wild oregano is truly a unique blend that offers the highest quality oil available. Although P73 Oreganol is already capable, it is further enhanced with cumin, sage, and cinnamon oil powders. These spices are potent antioxidants—far more so than berries or greens. The powerful properties of wild sage have been described throughout history for its benefit to the body, mind, and soul.* Sage is a robust, fat-soluble antioxidant, and cumin's antioxidant might are legendary. Finally, wonderfully fragrant cinnamon oil is added to the formula. Only high-grade cinnamon made from the edible bark is used, which has been gently extracted to ensure the highest potency.

OregaCLEAR is also available in an oil form and also as easy-to-take gelcaps, the latter being ideal for young children and those not needing the power of the dry capsule. Many find the greatest benefit from simultaneously taking the oil drops and the capsules. This synergistic blend is truly rare, not only for the quality of oils but also for the one-of-a-kind blend of spice oils.

Take one or two OregaCLEAR capsules daily. For a larger dose take two capsules three times daily. For prevention take at least one capsule daily. Children can take OregaCLEAR softgels, once per day. It is even safe for pets—just open a capsule and dust onto their food.
