

Sinu Orega™

Potent Multiple Spice Oil Sinus Spray

Supports a healthy sinus, respiratory system, and breathing mechanism*

Infestation of the air, especially indoors, with mold and fungi is pandemic. These potential pathogens are alive and well throughout human environments. These molds/fungi are inhaled and then flourish in the respiratory passages, especially within the sinuses. This includes mold spores, which, upon inhalation, flourish in the nasal sinuses and bronchial canals.

Sinusitis is highly prevalent in the American population and has been found to affect up to 37 million people, which is nearly one of seven Americans. Usually, with sinus infections antibiotics are prescribed, which may not only be ineffective but also may lead to antibiotic resistance. Many health practitioners agree that the use of a saline solution to flush out the nasal passages is the best approach. However, adding spice oils to the saline antiseptic takes this to the maximum power more effectively than merely spraying a mist of saline solution into the nasal passages.

Mold infestation becomes especially problematic in the spring and fall, when mold counts rise greatly. SinuOrega is the perfect natural therapy to deal with this.* As a sea salt-based spray fortified with the appropriate percentage of oils of wild oregano, bay leaf, and sage, along with clove bud oil, it is a potent therapy for sinus conditions.* Both wild sage and bay leaf oils have long been used as aids to respiratory conditions, while wild oil of oregano is a potent anti-fungal agent and is particularly powerful against molds and mold spores.*

With mold infestation the respiratory passages are compromised and readily plugged up. Powerful, therapeutic SinuOrega solves this with its blast of

saline-based wild oregano oil, wild sage oil, and wild bay leaf.* It's the perfect formula for resolving this and for causing an overall improvement in sinus health regardless of the challenge.*

Of all sinus spray formulas, SinuOrega is the superior choice to aid the cleansing process of the nasal membranes.* As well, it is the only truly natural nasal spray, free of all chemicals and additives.

How to use SinuOrega:

Insert nozzle next to inner nasal membrane and gently squirt. Immediately sniff contents deeply to distribute throughout the sinuses. Repeat with each nostril. Tilt the head backwards, if necessary, squirting into one nostril while holding closed the opposite one. Then, turn the head side to side to gain access to all the sinuses, repeating on the other side. Repeat as needed. Temporary burning, stinging, sneezing or increased nasal discharge may occur. Nasal discharge is a powerful sign of effective cleansing. Effectiveness may be enhanced by the simultaneous intake of OregaRESP capsules, especially in stubborn, chronic cases.

Non-addictive.

Now available in convenient 1 oz. size with special injection pump mist

Finally, breathe easy.*
